SUMMARY

Third-year BCA student specializing in Full Stack Development with hands-on project experience in React.js, Python, Flask, REST APIs, SQL/NoSQL databases, and AI/LLM applications. Built and deployed full-stack applications featuring role-based access control, API integrations, and RAG-based AI systems.

SKILLS

- **Languages:** JavaScript, Python,Java,TypeScript
- **Frontend:** React.js, HTML5, CSS3, Responsive Web Design, Tailwind CSS
- **Backend:** Flask, Node.js, REST API Development
- **Databases:** MongoDB, SupaBase ,MySQL
- **AI/ML:** RAG, LLM Applications, NLP, Vector Search, NLTK,DSA
- **Tools & Deployment:** Git, GitHub, VS Code, Vercel

PROJECTS

- **Murshid AI — RAG-Based Voice Assistant**
  Python | RAG | Vector Search | STT/TTS
- • Built a voice-enabled AI assistant that retrieves relevant information from a custom knowledge base before generating responses.
- • Implemented document ingestion, text processing, embedding generation, and semantic vector search for knowledge retrieval.
- • Integrated speech-to-text and text-to-speech pipelines to support voice-based interaction.
- • Designed the application to answer queries using retrieved context from uploaded documents
- **BusBuddy — Public Transit Chatbot**
  Python | Flask | NLTK
- • Developed a Flask-based chatbot for answering public bus route planning and fare-related queries.
- • Implemented natural language processing using NLTK to interpret user queries.
- • Built route and transfer suggestion logic to provide relevant travel options based on user input.
- • Exposed chatbot functionality through a web-based interface for interactive query handling.
- **MediFlow — Doctor Appointment Booking System**
  React.js | Flask | REST APIs | Role-Based Access Control
- • Developed a full-stack appointment booking platform supporting Admin, Doctor, and Patient roles.
- • Designed REST APIs for appointment scheduling and management with role-specific access controls.
- • Implemented RBAC to restrict application features and resources based on authenticated user roles.
- • Built separate workflows for appointment management across admin, doctor, and patient interfaces.

EDUCATION

Presidency University 2024 – 2027
Bachelor of Computer Applications (BCA) — Full Stack Development Bangalore, India
CGPA: 8.4/10.0

Lalit Narayan Mithila University 2022 – 2024
Class XII (State Board) Bihar, India
Percentage: 80.4%

Mount Litera Zee School 2021
Class X (CBSE)
Percentage: 90.4%

ACHIEVEMENTS

- Smart India Hackathon 2026 — Participated in institutional-level selection for an AI-powered criminal network analysis solution.
